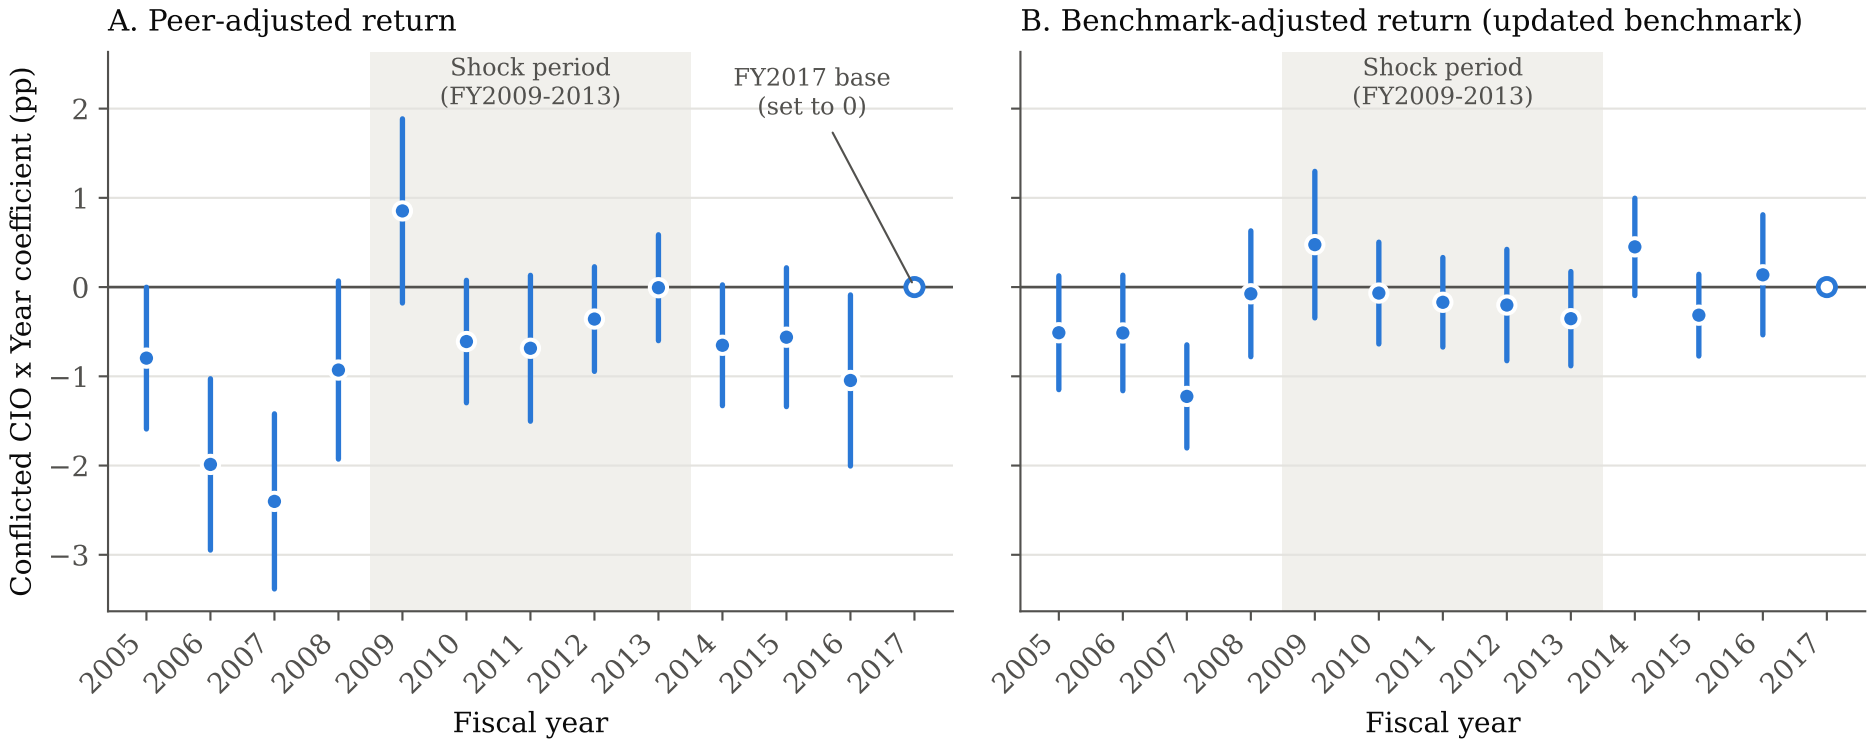
Event Study: Conflicted CIO Performance Around the Loglisci Shock



Pre-shock coefficients = 0: p = 0.000; equal: p = 0.001
Shock-period coefficients = 0: p = 0.000
Pre-shock minus shock period: -1.37 (t = -3.92); N = 1,565

Pre-shock coefficients = 0: p = 0.000; equal: p = 0.002
Shock-period coefficients = 0: p = 0.606
Pre-shock minus shock period: -0.52 (t = -1.79); N = 1,394

Coefficients on Conflicted CIO x fiscal-year indicators (FY2017 omitted) from the Table 5b specification with plan and year fixed effects; bars are 95% confidence intervals, standard errors double clustered by plan and year. Endpoint bins for years before 2005 and after 2017 are in the regression but not plotted. Shading marks FY2009-2013 (shock2 = 1).
