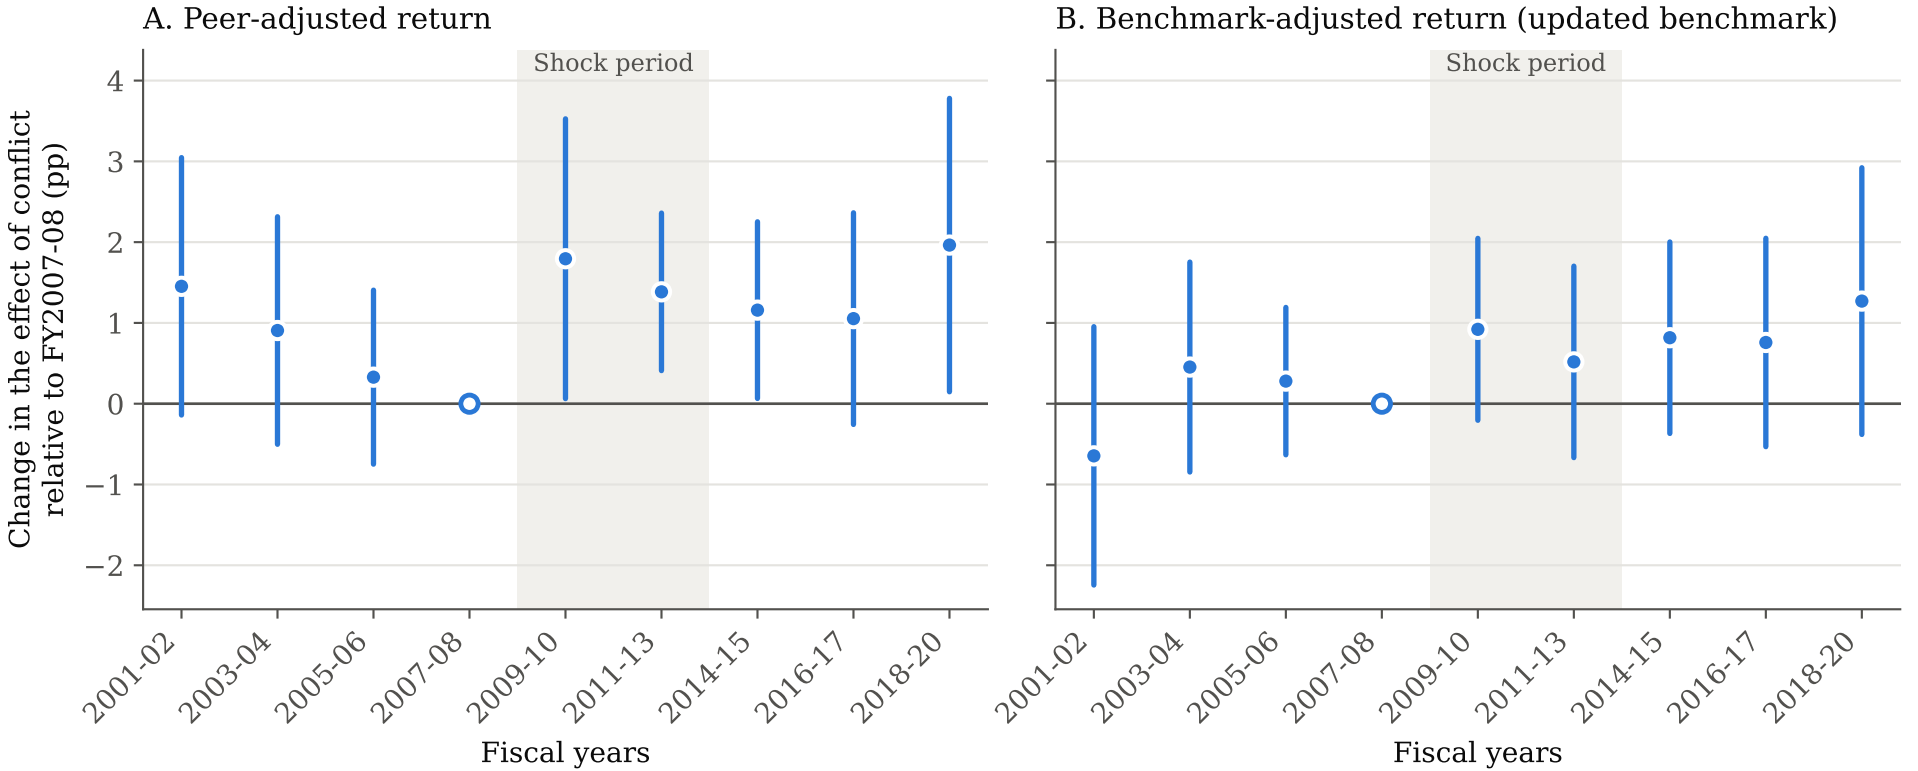
Event Study Around the Loglisci Shock (Two-Year Bins, FY2007-08 Base)



Pre-shock bins = 0: p = 0.268
Shock-period bins = 0: p = 0.026
Post-period bins = 0: p = 0.068; N = 1,565

Pre-shock bins = 0: p = 0.729
Shock-period bins = 0: p = 0.157
Post-period bins = 0: p = 0.374; N = 1,394

Coefficients on Conflicted CIO x period indicators relative to FY2007-08, from regressions that also include Conflicted CIO, the Table 5b controls, and plan and year fixed effects; bars are 95% confidence intervals, standard errors double clustered by plan and year. The shock period is split into FY2009-10 and FY2011-13.
