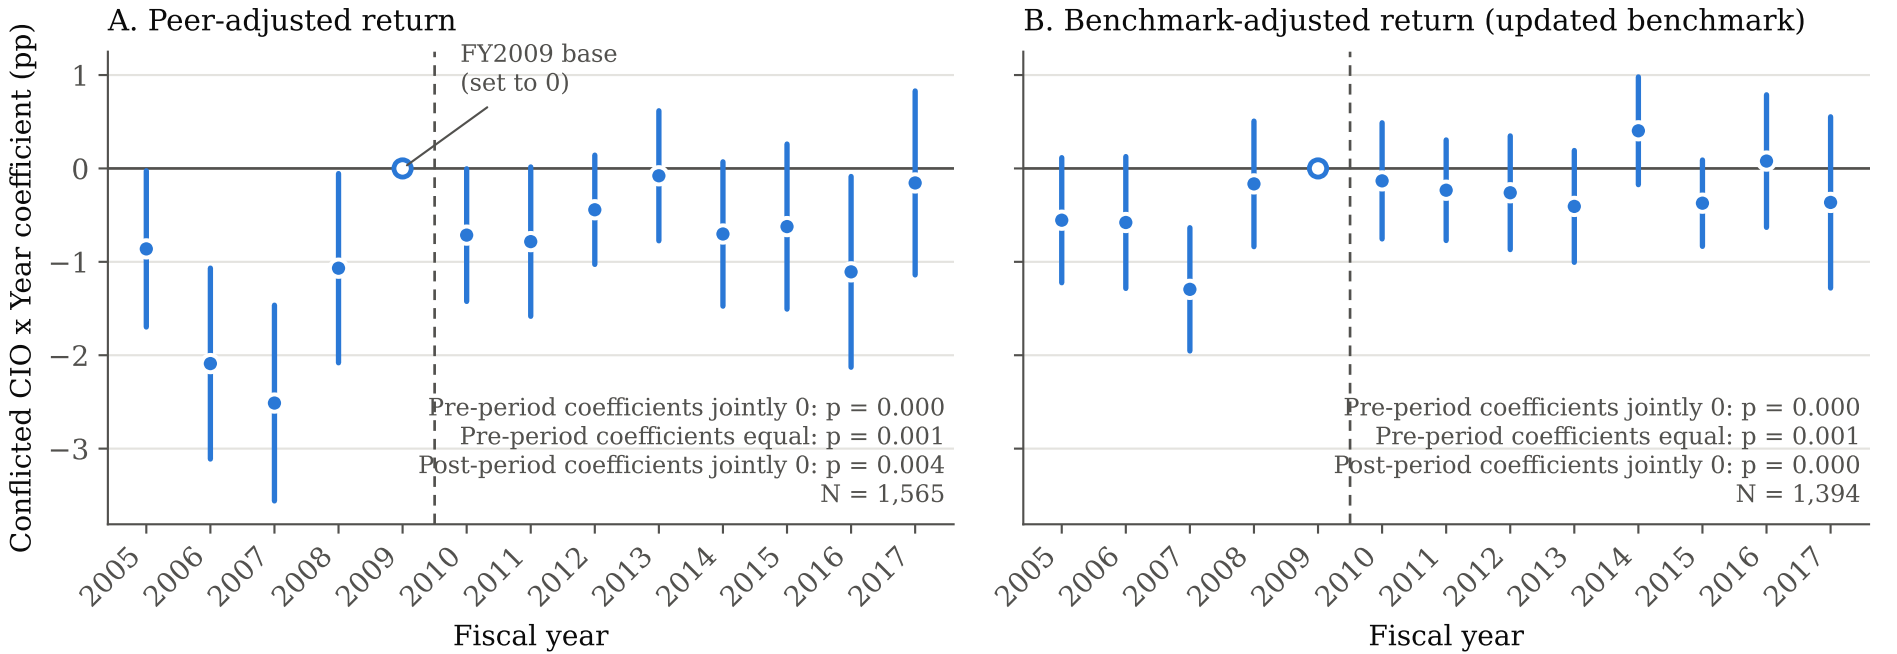
Event Study: Conflicted CIO Performance Around the Loglisci Shock



Coefficients on Conflicted CIO x fiscal-year indicators (FY2009 omitted) from the Table 5b specification with plan and year fixed effects; bars are 95% confidence intervals, standard errors double clustered by plan and year. Endpoint bins for years before 2005 and after 2017 are in the regression but not plotted. The dashed line marks the end of FY2009.
